Installation and Equipment Information

What is an Energy Star Heat Pump Dryer?

A heat pump dryer works as a closed loop system by heating the air using it to remove moisture from the clothes and then reusing it once the moisture is removed. Rather than releasing warm, humid air through a dryer vent to the exterior of the home as a conventional dryer does, a heat pump dryer sends it through an evaporator to remove the moisture without losing too much heat. Making use of a refrigerant as part of this process means less electricity is used to generate heat.

What is an Induction Cooktop/Stove?

Traditional cooktops use a flame or a burner that radiates and conducts heat to your pots and pans. Induction cooking uses an electromagnetic field that transfers currents directly to the cookware placed on the glass surface. The heat is created from within the cookware itself; as soon as you remove it from a burner, the heating stops. This way, you can cook your food without the cooktop getting as hot as it would on a traditional gas or electric cooktop. Any pots or pans with a flat bottom that a magnet sticks to will work with an induction cooktop. The latest models have ceramic-glass surfaces, which are durable and crack-resistant.

Terms and Conditions - Heat Pump Dryer & Induction Cooktop/Stove Incentives

Program Offer: The Program covers products purchased and/or services rendered on or after **January 1, 2024**.

ENERGY STAR® Heat Pump Dryer Requirements

1. These rebates are not available for homes receiving the Premier Home Incentive.
2. Must be listed as an ENERGY STAR qualified product at the time of purchase.
3. ENERGY STAR verification must be provided.
4. Limit of two (2) heat pump dryer rebates per home.

ENERGY STAR® Heat Pump Dryer Requirements

1. Must be listed as an ENERGY STAR qualified product at the time of purchase and usage must be ≤ 125 kWh per year
2. ENERGY STAR verification must be provided

Information for the existing electric water heater (if applicable) must be provided in the Additional Information table.

ENERGY STAR Verification:

ENERGY STAR qualification can be verified by one of the following:

1. Provide cutout of package showing ENERGY STAR logo, product type model.
2. Provide copy of yellow EnergyGuide label with ENERGY STAR logo.
3. Provide printout from ENERGY STAR website (www.energystar.gov) showing that the model is ENERGY STAR.

General Terms and Conditions

Rebates shall be pro-rated based on the percent of power supplied by the utility if the customer has distributed generation.

Application Information: Missing or incorrect information on the application may delay processing and delivery of the rebate. An invoice is required and should include specific product information, including the brand, model, serial number and date of purchase of the energy efficient measures. Other information including manufacturer's equipment performance sheets may be required upon request.

The Utility reserves the right to verify sales transactions and to have reasonable access to the Customer's facility to inspect pre-existing equipment (if applicable) and energy efficient measures installed under this program.

Warranty Information: The Utility makes no warranties, expressed or implied, with respect to equipment operation, material, workmanship or manufacturing. The Utility does not guarantee that a certain level of energy or cost savings will result from the use of products covered by this program.

Limitation of Liability: The Utility's liability in connection with this program is limited to paying the rebate specified when all terms and conditions have been satisfied. Under no circumstances shall the Utility be liable for any consequential or incidental damages or tax liability resulting from participation in this program.

Participant Certification: Participating Customer certifies that he/she purchased and installed the equipment listed on their application at the defined location served by the Utility. The Customer agrees that all information provided is true and that he/she has conformed to all program requirements. If the equipment and application does not comply with the Utility's rules and qualifications, the rebate amount may be denied or adjusted.

Program Changes/Termination: The Utility reserves the right to extend, modify (including incentive levels) or terminate this Program at any time without prior or further notice. The Customer is responsible for checking with the Utility to determine whether the program has been changed or is still in effect.

Customers must apply for rebates within six (6) months of the purchase date (as shown on the Customer's invoice) and are subject to the current year program offer if received after January 31st. Past eligibility, however, does not guarantee that equipment will meet criteria for current programs in effect.
